

PHOTOELECTRIC STANDARD SENSORS

Edition 2006

Photoelectric sensors are in the forefront of modern production automation.

Their reliability is decisive in the functionality of the overall system. Their characteristics have decisive influence on their cost, cost-effectiveness and quality.

With the VISOLUX brand, Pepperl+Fuchs offers one of the largest lines of modern photoelectric sensors on the market. This includes standard sensors in a wide variety of designs for typical automation tasks like detection, recognition or positioning. The high-end sensors are suitable for demanding detection tasks such as reading of barcodes, measurement of distances, data transmission using light, or industrial image processing.

VISOLUX Sensors – they also include safety sensors for the protection of personnel. The contact-free safety systems are usable in many applications.

The convenient and simultaneously safe operation of doors, gates, and elevators is the topic of industry-specific door and elevator sensors.

VISO+ is the symbol for a new generation of photoelectric standard sensors with precisely the feature set you need today.

- They guarantee reliable operation even under unfavourable conditions.
- They allow rational use, from commissioning to fault detection to storage.
- They have a flexible design in order to satisfy a wide spectrum of application requirements.

VISO+ stands for a decisive step forward in development which combines increased functionality with maximum cost-effectiveness.

VISO+ – All devices with this symbol fulfil these decisive plus points:

- Especially bright, easily visible display LEDs
- LED green for POWER-ON
- Resistance to interference from external HF light
- Protected against mutual interaction
- Modern output stages such as push-pull or AS Interface 2.11

SERIES ML6-8-H

SERIES ML7/ML71

- Precise background suppression
- Minimum black/white difference
- Miniature design
- Powerful push-pull output
- Optical surface made of glass
- Mounting holes with metal reinforcement

- Excellent background suppression and minimum black/white difference
- Small, sharp light spot
- Various fixed scanning ranges and one adjustable version additional LED display behind front panel
- Antivalent push-pull output stage
- Mounting holes with metal reinforcement

- Light outlet on side: ML7 or front: ML71
- Flexible mounting with three mounting holes and elongated hole (slot)
- LED flashing green in case of short circuit

SERIES ML8

- Miniature light tree, specially for warehousing and conveyor systems
- Versions with M8 connector or pigtail
- No operating components
- Yellow function indicator behind front panel
- Flexible mounting with three mounting holes and elongated hole (slot)

SERIES ML17

- Frontal mounting with M18 thread, alternatively with lateral bores
- Connection variants with M8 connector, M12 connector, fixed cable or pigtail
- Adjustable sensitivity or sensing range
- Robust, water-tight plastic housing

SERIES MLV12

- Yellow flashing function indicator on front and back of device
- LED flashing green in case of short circuit
- Robust housing - water-tight and impact-resistant with dovetail mounting and through holes

SERIES MLV40/MLV41

- Low housing depth, robust metal housing
- Precise background suppression adjustable up to 350 mm, small black/white difference
- 2 devices in one: Reflex light beam switch or reflex light beam switch for clear glass detection
- High switching frequencies
- Antivalent push-pull output stage

Highlights

DAD15-8P

- Compact optical data coupler for 8-bit parallel data transmission
- Very large opening angle

DAD30

- Flat optical data coupler with three interfaces in one unit
- Wide-angle version

General technical data

Detection range	2.5 m / 5 m	20 m / 45 m / 150 m
Data rate	225 Bit/s	0 kBit/s ... 19.2 kBit/s
Interfaces	8-bit parallel, bidirectional, 10 PNP inputs and 10 PNP outputs / 8-bit parallel, bidirectional, 10 NPN inputs and 10 NPN outputs	RS 232, RS 422 and CL 20mA
Operating voltage	10 V DC ... 60 V DC	24 V DC +/- 25 %
Type of light	Infrared light	Infrared light / red light
Opening angle	8° / 20°	Transmitter: 1° and receiver: 5° / transmitter and receiver: 16°
Function indicator	Power-On / data flow	Switching state / pre-fault
Protection class	IP 67	IP 65
Dimensions	76 mm x 56 mm x 53 mm	150 mm x 64 mm x 50 mm
Connection type	2 x M16 screw connections with spring terminals in terminal compartment	Sub-D connector, 25-pin, encapsulated
Custom equipment	Cascadable / sensitivity adjustment / function switch / test input	Alignment aid / DIP switch / measurement output / pre-fault output / wide-angle version /

SERIES VDM35

- Precise propagation time measurement
- Simple alignment with integrated pilot laser
- Device version for work on reflector and diffusely reflecting objects
- 2 adjustable switch outputs
- Insensitive to external light
- Analogue output 4 ... 20 mA

SERIES VDM80

- New expanded measurement range up to 150 m or 240 m
- Extremely low temperature drift
- Versatility in usage due to 8 measurement modes
- Precise positioning due to high repeat accuracy
- Easy alignment due to laser pointer and fine adjustment option

STANDARD REFLECTORS

Order code	Description
REFLECTOR H50	Rectangular reflector 50.9 mm x 50.9 mm
REFLECTOR H60	Rectangular reflector 60 mm x 40.5 mm
REFLECTOR H85	Rectangular reflector 84.5 mm x 84.5 mm
REFLECTOR H160	Rectangular reflector 60 mm x 18 mm
REFLECTOR C110-2	Round reflector, diameter = 84 mm
REFLECTOR ORR50G	Rectangular reflector with polarisation filter for glass/membrane detection, 50 mm x 50 mm
REFLECTOR VR10	Rectangular reflector 60 mm x 19 mm
OFR-100/100	Reflective foil cutout 100 mm x 100 mm, suitable for polarisation photodetectors
REFLECTOR MH23	Reflector with microstructure, special for laser photodetectors, 23 mm x 13.8 mm

STANDARD CONNECTOR CABLES

V3-GM-2M-PVC	Straight plug connector, M8, 3-pin with 2m PVC cable

SIGNALS FOR THE WORLD OF AUTOMATION

For half a century Pepperl+Fuchs has continuously provided new impulses for the world of automation and set standards for quality and innovative technology. We develop, produce and sell electronic sensors and interface components worldwide. Due to our global presence and the high flexibility in production and services, we offer you individual complete solutions – where you need us. We know what we are talking about – Pepperl+Fuchs is regarded as the company with the world's largest choice of industrial sensor technology for a wide variety of applications. **Our signals move the world.**
